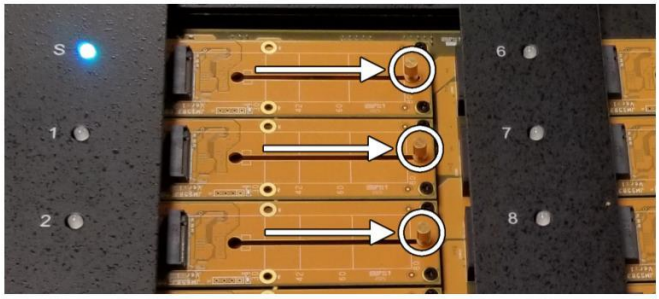
KanguruClone 11 M.2 NVMe Pro Duplicator
Quick Start Guide

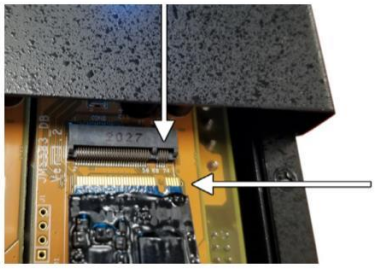
Models: KCLONE-11NVME

This is a Quick Start Guide only. For detailed information about your KanguruClone NVMe Duplicator, please refer to the User Guide. A digital copy of the User Guide can be downloaded from our support website at: support.kanguru.com

1. Slide all Drive Locking Pins away from the M.2 sockets



2. Align the M.2 SSD to the Socket with the M-key notch positioned to the right.



3. Insert the drive into the socket at about a 30º angle.

4. Press down on the back of the drive so that it lies parallel with the duplicator.

5. Slide the Drive Locking Pin into the notch located at the rear of the drive.

6. Repeat until all drives are connected.

It is OK to connect and disconnect Master or Target drives while the KanguruClone is powered on. However, do NOT connect or disconnect drives while any operation is running or is in progress.

The KanguruClone NVMe Duplicator is guaranteed to be free from defect in materials and workmanship for one year. If you experience any problems using your Kanguru Duplicator or have any technical questions, please call our technical support department.
Our tech support is free and available Monday through Friday, 9am to 5pm EST.
