KanguruClone 4 NVMe Duplicator Quick Start Guide

Models: KCLONE-4NVMe

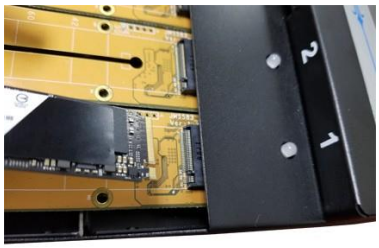

This is a Quick Start Guide only. For detailed information about your KanguruClone NVMe Duplicator, please refer to the User Guide. A digital copy of the User Guide can be found on our website at: support.kanguru.com

To connect an NVMe solid state drive to the KangurClone 4 NVMe:

1. Make sure all Drive Locking Pins are pushed all the way to the end of the duplicator.

2. Hold the drive with the M-key notch aligned to the right side.

3. Insert the drive into one of the duplicator's M.2 ports at about a 300 angle. **Note:** you can identify the Source port location by the blue LED indicator.

4. Press down on the back of the drive so that it lies parallel with the duplicator. There should be a few mm space between the drive and the duplicator.

5. Slide the Drive Locking Pin into the notch located at the rear of the NVMe drive.

6. Repeat for Target drives until all drives are connected.

It is OK to connect and disconnect Master or Target drives while the KanguruClone is powered on. However, do NOT connect or disconnect drives while any operation is running or is in progress.

The KanguruClone NVMe Duplicator is guaranteed to be free from defect in materials and workmanship for one year. If you experience any problems using your KanguruClone Hard Drive Duplicator or have any technical questions, please call our technical support department. Our tech support is free and available Monday through Friday, 9am to 5pm EST.

ATTENTION!

In the event that your Kanguru Duplicator is not operating correctly, you should immediately contact Technical Support at:

Phone: 508-376-4245

In the event that Kanguru Solutions' Tech Support diagnosis a defective Duplicator, we will issue a Return Authorization Number and your duplicator will be repaired after we receive and test the unit. All RMA returns must have a Return Authorization Number, as issued by Kanguru Solutions, clearly printed on the outside of the box or it will be refused.

KEEP YOUR ORIGINAL PACKAGING!

All duplicators sent in for repair must be returned in the original packaging issued by Kanguru Solutions. **Any duplicators that are not returned in their original packaging will be refused for repair.** If you do not have your original packaging, contact Tech Support to purchase the packing materials.
